In line with the behavioral habits of the new era, the logic of mobile office, and the ever-changing needs of the office, the fixed old office model will be eliminated.

From the prevalence of rental culture to the development of mobile devices, all of them are proved the innovation of office behavior logic. Compared with the previous generation's stable and conservative work concept, modern people are more in pursuit of living in the present, which is the core of the use of non-possession.

USE WITHOUT POSSESSION

Different office needs correspond to different space, this is not only to achieve the maximum utilization of space, reasonable demand for the use of space, but also to allow people to better enter the work state, without interference from other undesirable factors. Finally the work will be twice as effective.

What people need to occupy is never space, but to control their own life. Putting the plural MO BOX into open office space can make full use of the office space and give full play to the ability to work, so that each space is used to the fullest, every second of work is maximized, very moment of life is not wasted. This is the highest embodiment of the use of the use of non-possessed.

DIVERSIFIED EXPERIENCE

Escape from the cubes limitations, so that different work has more suitable environment and the free spirit will be not harnessed by the work. MO BOX, for every self-contained soul, for every unique you.

“MO BOX”

SELF- CONTAINED OFFICE

MO BOX has different colors, sizes and functions to meet the increasingly diversified needs. UVO deeply researches the behavioral habits of different needs, the psychological needs of color and product usage, and brings the most suitable visual and usage experience for each product.

At the same time, MO BOX provides customized services according to area, function, configuration and decoration to meet all the unique and independent space needs. UVO has always been pursuing the most comfortable experience for users.

From religious needs, to quiet needs, from separate spaces, to gathering and entertaining, each segment of the experience needs to be emphasized. These complex, colorful, and meaningful needs make up today's MO BOX and make UVO what it is.

Apart from sleeping, work takes up half of our daily lives. Work is the process of realizing goals and dreams, but most of us are stuck in a city pieced together by squares, a high-rise building stacked with blocks, a desk that seems to be divided by invisible cubes, repeating the scenery, repeating our lives.

VENTILATION OPTIMAL

Passed SGS air test, follow the natural experience of top air in and bottom air out, guarantee the indoor air quality and regulate the indoor temperature, full pod air change from 45 seconds to 112 seconds according to the product size.

POWER SUPPLY AND SAFETY

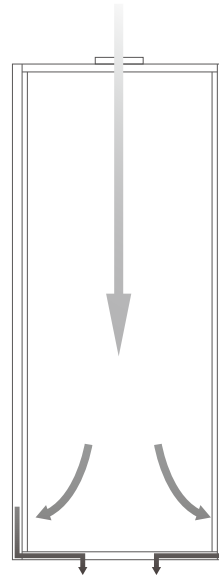

Concealed power supply, wires coming out of the bottom.

Weak electricity is used above the tabletop in the use area and the control panel is mounted on the wall, so it is convenient and unobstructed.

45" - 112"

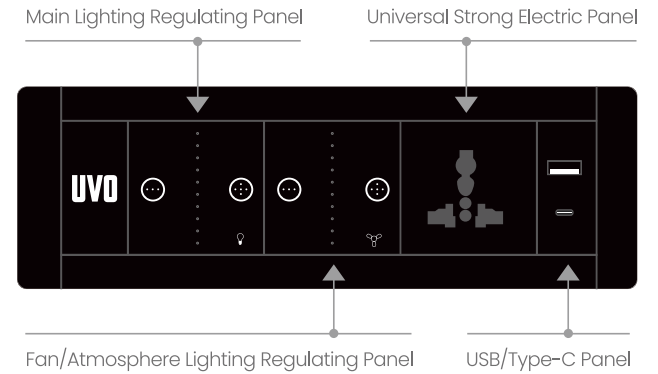

REAR VIEW

DOOR ACCESS DESIGN

Hidden hinge design, 95 degrees limit of door body, side-by-side use of pods; optional hidden door closer with automatic return, these all make better space utilization.

“ 95 DEGREES LIMIT OF DOOR BODY ”

“ CENTRALIZED CONTROL SYSTEM ”

PASSIVE HUMAN INFRARED SENSOR SWITCH

Fresh air system and ambient lighting are automatically activated by human body sensors and shut down automatically after a 5-minute delay. During the period of inactivity of the pod, the fresh air system automatically changes the air for 5 minutes every 30 minutes. The main lighting is designed as a physical switch by default, which is more in line with the behavioral logic of the design.

Fresh air system, ambient lighting and main lighting, all of which can be adjusted automatically.

COMPLEX SPACE ADAPTATION

The space from single to multi-person, the office posture from low to high and from fixed to adjustable lifting, this full range of office space meets various needs.

ADJUSTMENT MECHANISM

Labor-saving

The base uses a patented foot-cup design with **a maximum load capacity of 200KG, which can be easily adjusted with only one person's strength**

Adjustable 35-60mm base, suitable for both wall plug and floor plug, adaptable to uneven ground and different architectural environments.

In order to meet the demand for space changes, the base is equipped with wheels and can be moved at any time after lifting the fixed foot-cup.

“ PASSED SGS ”

Adopting laminated glass, installing sound-absorbing materials inside the pod to reduce reverberation coefficient.

Passed TUV (ASTM standard) test NIC=30, NR=24.12;

Passed SGS (ISO standard) test, B Class, sound insulation coefficient 26.9.

SOUND INSULATION

SPARE PARTS

The factory default spare parts are fixed and stored at the bottom of pod can avoid the loss of spare parts, difficulties in storage and the embarrassment of maintenance after the product update.

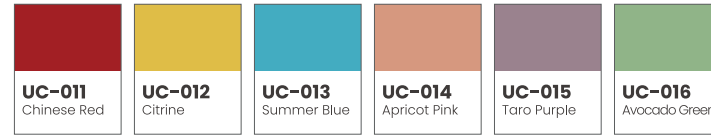

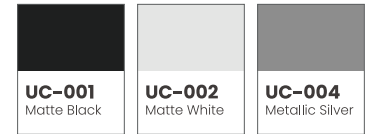

PERSONALIZED ADJUSTMENT

The height of the tabletop can be adjusted to avoid the inconvenience caused by high seats, and can also adapt to different non-adjustable seat heights such as wheelchairs.

ABOUT US

UVO was founded in Hong Kong in 2017, that is a cutting-edge brand enterprise headquartered in Hong Kong that focuses on interior and exterior wall and smart modular space product system, integrating technical R&D, design, innovation, sales and services.

UVO team has focused on the development of offices planning and implementation for years. The ideal office environment should be a total solution for enterprises, employees and owners, rather than intractability. MO BOX breaks down from the traditional concept, it is an integrated module, considering the function and personnel headcount in each space, and the four elements of lighting, electricity, sound insulation and ventilation.

As a whole, it offers the advantages of timeliness, convenience, mobility and reusability. It makes the layout of office space as simple as building blocks. When function or space needs change, reconstruction takes just a few days. Currently, we have choices of standard MO BOX rooms in different sizes, they can satisfy single person or multi-person coworking needs. At the same time, rooms can also be customised with different themes and sizes to meet more personalized.
